PROFESSIONAL SUMMARY

Technical Delivery Manager with 10+ years in software delivery and engineering across SaaS, financial services, energy and logistics. Runs delivery for 3 Agile teams at Flipdish, reporting to C-level leadership, after four years of client-facing delivery for US clients through Remotebase. Owns the full delivery lifecycle: roadmap and release planning, sprint cadence, backlog prioritisation, RAID and dependency management, delivery governance and incident response. PMP and PMI-ACP certified, with hands-on cloud-native depth (AWS serverless, Node.js, TypeScript).

KEY ACHIEVEMENTS

- Improved customer onboarding efficiency by about **40%** at Flipdish by introducing AI-assisted workflows, cutting manual effort and early-stage client churn.
- Cut production incidents by about **50%** at Gridware while leading delivery for a **team of 12**, by introducing observability and operational-readiness practices.
- Increased delivery throughput by up to **50%** at Northwestern Mutual by embedding Agile and Scrum practices across cross-functional teams.
- Run delivery for **3 Agile teams** at Flipdish across concurrent product initiatives, reporting directly to C-level leadership.
- **Promoted twice in under two years** at Remotebase, from Senior Software Engineer to Senior Software Engineering Manager, owning delivery for US client engagements. Mentored **30+ engineers**.

SKILLS

Delivery and Leadership: Delivery Management, Programme and Project Management, Agile (Scrum, Kanban), Sprint and Release Planning, Roadmapping, Backlog Prioritisation, RAID and Dependency Management, Delivery Governance and Reporting, PMO Practices, Budget and Scope Control, Resource and Capacity Planning, Client Engagement, Engineering Management, Team Leadership, Mentoring, Hiring

Stakeholders and Operations: C-Level Reporting, Senior Stakeholder Management, Vendor and Cross-Functional Coordination, Incident and Crisis Management, SLO/SLA

Technical: Cloud and Serverless Delivery, AI-Assisted Delivery, Node.js, TypeScript, React, React Native, AWS (Lambda, serverless, microservices), GraphQL, CI/CD, Docker, Kubernetes, PostgreSQL, MongoDB, Datadog, Grafana, Sentry

Tools: Jira, Confluence, GitHub Copilot, Claude

PROFESSIONAL EXPERIENCE

Software Engineering Manager

Flipdish (Food-tech SaaS) | Ireland (Remote) | Apr 2025 - Present

- Run delivery for 3 Agile teams across concurrent product initiatives, translating business priorities into roadmap, sprint and release commitments.
- Own the delivery lifecycle end to end: release planning, sprint cadence, backlog prioritisation and risk reporting to C-level leadership.
- Improved customer onboarding efficiency by about 40% by introducing AI-assisted workflows for onboarding and menu creation, cutting manual effort and contributing to lower early-stage client churn.
- Serve as Incident Manager, leading production incident response and post-incident reviews.
- Drive architectural decisions for platform scalability, reliability, security and performance.

Fractional CTO

DEVSY (Self-employed, part-time advisory) | Saudi Arabia (Remote) | Sep 2023 - Present

- Part-time advisory engagement alongside full-time roles: set product architecture and platform strategy for AI-first products (autonomous agents, GenAI workflows) and coach the engineering team on ownership, fast feedback and experimentation.

Delivery Manager | Engineering Manager

Remotebase (Remote engineering talent partner) | United States (Remote) | Aug 2021 - May 2025

- Promoted twice in under two years, from Senior Software Engineer (Aug 2021) to Software Engineering Manager (Aug 2022) and Senior Software Engineering Manager (Jul 2023), owning delivery and team leadership for the US client engagements listed below.

Delivery Manager | Engineering Manager

Gridware (Energy and utilities tech, via Remotebase) | United States (Remote) | Jan 2024 - Apr 2025

- Managed delivery for a team of 12 on cloud-native, mobile-first platforms and owned production stability.

- Cut production incidents by about 50% by introducing observability and operational-readiness practices across core platforms, moving the team from reactive firefighting to prevention.
- Ran roadmap and delivery governance directly with C-level stakeholders and external customers, including status, risk and milestone reporting.
- Designed serverless solutions on AWS using microservices and SOA (NestJS), and streamlined delivery with GraphQL, AWS Amplify and CI/CD pipelines.

Delivery Manager | Technical Team Lead

Northwestern Mutual (Financial services, via Remotebase) | United States (Remote) | Aug 2022 - Dec 2023

- Increased delivery throughput by up to 50% by implementing Agile and Scrum practices that improved sprint execution, predictability and team coordination.
- Led cross-functional teams across frontend, backend and DevOps, coordinating dependencies and releases.
- Delivered scalable applications with React Native and FastAPI, and designed and managed AWS-based CI/CD pipelines.
- Owned delivery governance for the engagement, reporting status, risks, issues and milestones to senior leadership.

Senior Software Engineer

Capbase (Fintech, via Remotebase) | United States (Remote) | Aug 2021 - Aug 2022

- Led delivery of serverless systems on AWS Lambda with microservices, and built GraphQL and AWS Amplify backends.
- Enforced code quality through unit testing, code reviews and delivery standards.
- Onboarded and mentored team members, raising delivery consistency.

Senior Software Engineer

TLX Mobility, a Techlogix Company | Karachi, Pakistan | Apr 2020 - Aug 2021

- Delivered cloud-based backend systems for Nokia Pakistan and Middle East.
- Built serverless applications on Azure Functions and microservices-based APIs.
- Resolved security findings from penetration tests and audits, and fixed performance issues and memory leaks.

Software Engineer

TLX Mobility, a Techlogix Company | Karachi, Pakistan | Oct 2017 - Apr 2020

- Built Angular and AngularJS frontends for FMCG and Payments products for clients including Nestle and Unilever.
- Developed serverless applications and microservices-based APIs.

Junior Software Developer

KNYSYS | Karachi, Pakistan | Aug 2016 - Oct 2017

- Dual Android and backend role, delivering end-to-end features across the full SDLC in fast-paced client projects.
- Built RESTful APIs with Django and web2py, integrated YouTube and Google Maps APIs, and developed browser extensions for real-time user monitoring.

SELECTED PROJECTS

- WheeKeep, Storage and Logistics platform (Saudi Arabia): architected the mobile app (iOS and Android) and web portal with instant booking, real-time delivery tracking and on-demand returns, supporting 10,000+ deliveries across 5 cities.
- Lugmety, Food-Recommendation AI (Gulf food delivery): personalisation engine for larger baskets and repeat orders.
- Salasa, Delivery-ETA AI (Gulf e-commerce fulfilment and logistics): delivered the delivery-time estimation model sharpening fulfilment planning and customer trust.

CERTIFICATIONS

- PMI: Project Management Professional (PMP), PMI Agile Certified Practitioner (PMI-ACP), Value Stream Management. All badges verifiable on Credly via anasabdani.dev
- PMI: Generative AI Overview for Project Managers, Data Landscape of GenAI for Project Managers, PMI Citizen Developer Practitioner, PMI Citizen Developer Business Architect

EDUCATION

B.E. Software Engineering | NED University of Engineering and Technology, Karachi | 2013 - 2017
