

Muhammad Anas Abdul Wahab

Engineering Manager | Software Delivery and Cloud-Native Platforms | PMP, PMI-ACP

Riyadh, Saudi Arabia | Email: anas_abdani@hotmail.com | Phone: +966 572201977 (Call/WhatsApp)

LinkedIn: linkedin.com/in/anas-abdani | Website: anasabdani.dev | Nationality: Pakistani

PROFESSIONAL SUMMARY

Engineering Manager with 10+ years in software engineering and delivery, currently leading 3 Agile teams at Flipdish and reporting directly to C-level leadership. Owns the delivery lifecycle: sprint planning, backlog prioritization, release execution, risk and incident management. Pairs PMP and PMI-ACP certified delivery discipline with hands-on cloud-native experience (AWS serverless, microservices, Node.js, TypeScript). Has shipped AI products for Gulf food-tech and logistics companies.

KEY ACHIEVEMENTS

- Lead **3 Agile teams** at Flipdish across multiple concurrent product initiatives, reporting directly to C-level leadership.
- Led a **team of 12** at Gridware and cut production incidents by about **50%** through observability and operational readiness.
- Increased delivery throughput by up to **50%** at Northwestern Mutual through Agile and Scrum practices.
- Improved customer onboarding efficiency by about **40%** at Flipdish with AI-assisted workflows, lowering early-stage churn.
- **Promoted twice in under two years** at Remotebase, from Senior Software Engineer to Senior Software Engineering Manager. Mentored **30+ engineers**.

SKILLS

Leadership and Delivery: Engineering Management, Team Leadership and Mentoring, Hiring and Interviewing, Project and Program Management, Agile, Scrum, Kanban, Sprint Planning, Backlog Prioritization, Release Management, Roadmapping, Risk and Dependency Management, Delivery Governance, PMO Practices, Budget and Scope Control

Stakeholders and Operations: C-Level Reporting, Stakeholder Management, Vendor and Cross-Functional Coordination, Incident and Crisis Management, SLO/SLA

Technical: Cloud and Serverless Delivery, AI-Assisted Delivery, Node.js, TypeScript, React, React Native, AWS (Lambda, serverless, microservices), GraphQL, CI/CD, Docker, Kubernetes, PostgreSQL, MongoDB, Datadog, Grafana, Sentry

Tools: Jira, Confluence, GitHub Copilot, Claude

PROFESSIONAL EXPERIENCE

Software Engineering Manager

Flipdish (Food-tech SaaS) | Ireland | Apr 2025 - Present

- Lead 3 Agile teams delivering multiple concurrent product initiatives, reporting directly to C-level leadership and aligning engineering delivery with business priorities.
- Improved customer onboarding efficiency by about 40% by introducing AI-assisted workflows for onboarding and menu creation, cutting manual effort and contributing to lower early-stage client churn.
- Own the delivery lifecycle end to end: sprint planning, backlog prioritization, release execution and risk reporting.
- Drive architectural decisions for platform scalability, reliability, security and performance.
- Serve as Incident Manager, leading production incident response and post-incident reviews.

Fractional CTO

DEVSY (Self-employed) | Saudi Arabia (Remote) | Sep 2023 - Present

- Set product architecture and platform strategy for AI-first products, building autonomous agents, GenAI-powered workflows and cloud-native platforms that scale with customers.
- Build and coach engineering teams, with a culture of ownership, fast feedback and experimentation.

Senior Software Engineering Manager

Remotebase | United States (Remote) | Aug 2021 - May 2025

- Promoted twice in under two years, from Senior Software Engineer (Aug 2021) to Software Engineering Manager (Aug 2022) to Senior Software Engineering Manager (Jul 2023), while working full-time with the US clients listed below.

Software Engineering Manager

Gridware (via Remotebase) | United States (Remote) | Jan 2024 - Apr 2025

- Managed a team of 12 on cloud-native and mobile-first platforms, owning incident management and production stability.
- Cut production incidents by about 50% by introducing observability and operational-readiness practices across core platforms, moving the team from reactive firefighting to prevention.

- Aligned roadmap and delivery directly with C-level stakeholders and external customers.
- Designed serverless solutions on AWS using microservices and SOA (NestJS), and streamlined delivery with GraphQL, AWS Amplify and CI/CD pipelines.

Technical Team Lead

Northwestern Mutual (via Remotebase) | United States | Aug 2022 - Dec 2023

- Increased delivery throughput by up to 50% by implementing Agile and Scrum practices that improved sprint execution, predictability and team coordination.
- Led cross-functional teams across frontend, backend and DevOps workstreams.
- Delivered scalable applications with React Native and FastAPI, and designed and managed AWS-based CI/CD pipelines.
- Reported delivery status, risks and milestones directly to senior leadership.

Senior Software Engineer

Capbase (via Remotebase) | United States | Aug 2021 - Aug 2022

- Led delivery of serverless systems on AWS Lambda with microservices, and built GraphQL and AWS Amplify backends.
- Enforced code quality through unit testing, code reviews and delivery standards.
- Onboarded and mentored team members, raising delivery consistency.

Senior Software Engineer

TLX Mobility, a Techlogix Company | Karachi, Pakistan | Apr 2020 - Aug 2021

- Delivered cloud-based backend systems for Nokia Pakistan and Middle East.
- Built serverless applications on Azure Functions and microservices-based APIs.
- Resolved security findings from penetration tests and audits, and fixed performance issues and memory leaks.

Software Engineer

TLX Mobility, a Techlogix Company | Karachi, Pakistan | Oct 2017 - Apr 2020

- Built Angular and AngularJS frontends for FMCG and Payments products for clients including Nestle and Unilever.
- Developed serverless applications and microservices-based APIs.

Junior Software Developer

KNYSYS | Karachi, Pakistan | Aug 2016 - Oct 2017

- Dual Android and backend role, delivering end-to-end features across the full SDLC in fast-paced client projects.
- Built RESTful APIs with Django and web2py, integrated YouTube and Google Maps APIs, and developed browser extensions for real-time user monitoring.

GULF-MARKET PROJECTS

- WheeKeep, Storage and Logistics platform (Saudi Arabia): architected the mobile app (iOS and Android) and web portal with instant booking, real-time delivery tracking and on-demand returns, supporting 10,000+ deliveries across 5 cities.
- Lugmety, Food-Recommendation AI (Gulf food delivery): personalization engine for larger baskets and repeat orders.
- Salasa, Delivery-ETA AI (Gulf e-commerce fulfillment and logistics): delivered the delivery-time estimation model sharpening fulfillment planning and customer trust.

CERTIFICATIONS

- PMI: Project Management Professional (PMP), PMI Agile Certified Practitioner (PMI-ACP), Value Stream Management
- PMI: Generative AI Overview for Project Managers, Data Landscape of GenAI for Project Managers, PMI Citizen Developer Practitioner, PMI Citizen Developer Business Architect
- IBM: IBM Blockchain Essentials. All badges are verifiable on Credly, linked from anasabdani.dev

EDUCATION

B.E. Software Engineering | NED University of Engineering and Technology, Karachi | 2013 - 2017

RECOMMENDATIONS

"Anas combines technical excellence with leadership, ownership, and integrity... Any organization would be lucky to have him."
Qasim Salam, CEO, Remotebase (managed Anas directly)

"The definition of going above and beyond as a software leader... the perfect engineering partner to build a complicated and reliable product."

A Bin Omar, Co-founder and CPO, Gridware. More: linkedin.com/in/anas-abdani/details/recommendations
