PROFESSIONAL SUMMARY

Engineering Manager and Solution Architect with 10+ years leading multi-team engineering organizations and shipping scalable, cloud-native platforms. Strong in AWS serverless, microservices, Node.js, TypeScript, React, React Native, observability and incident command. Has shipped AI products for Gulf food-tech and logistics companies. PMP and PMI-ACP certified.

KEY ACHIEVEMENTS

- Architected the WheeKeep storage and logistics platform in Saudi Arabia (iOS, Android, web portal, cloud-native backend), supporting **10,000+ deliveries** across 5 cities.
- Led a **team of 12** at Gridware and cut production incidents by about **50%** by introducing observability.
- Designed serverless AWS solutions at Gridware and Capbase with Lambda, microservices, NestJS and GraphQL.
- Improved customer onboarding efficiency by about **40%** at Flipdish with AI-assisted workflows, and increased delivery throughput by up to **50%** at Northwestern Mutual.
- Lead **3 Agile teams** at Flipdish, reporting directly to C-level leadership.
- **Promoted twice in under two years** at Remotebase. Mentored **30+ engineers**.

SKILLS

Leadership: Engineering Management, Team Leadership and Mentoring, Hiring and Interviewing, Agile, Scrum, C-Level Stakeholder Alignment, Incident Command

Architecture: Solution Architecture, Software Architecture, Microservices, Event-Driven Design, Serverless, Domain-Driven Design (DDD), SOLID, Design Patterns, Monorepos

Languages: TypeScript, JavaScript (ES6+), Python, SQL, Bash

Frontend: React, Next.js, React Native, Redux Toolkit, Tailwind CSS

Backend and APIs: Node.js, NestJS, Express, GraphQL, REST, WebSockets, gRPC

Cloud and DevOps: AWS (Lambda, S3, EC2, Amplify, DynamoDB), Docker, Kubernetes, Terraform, CI/CD (GitHub Actions, GitLab CI, Jenkins), Nginx

Data: PostgreSQL, MongoDB, Redis, DynamoDB, MySQL, Prisma

Observability: Datadog, Grafana, Prometheus, Sentry, CloudWatch, SLO/SLA, On-call

AI: AI-Augmented Engineering, LLM integration, RAG, AI agents, GitHub Copilot, Claude, prompt engineering

PROFESSIONAL EXPERIENCE

Software Engineering Manager

Flipdish (Food-tech SaaS) | Ireland | Apr 2025 - Present

- Lead 3 Agile teams across concurrent product initiatives and own delivery end to end, reporting to C-level leadership.
- Drive architectural decisions for platform scalability, reliability, security and performance.
- Improved customer onboarding efficiency by about 40% by introducing AI-assisted workflows for onboarding and menu creation, contributing to lower early-stage client churn.
- Serve as Incident Manager, leading production incident response and post-incident reviews.

Fractional CTO

DEVSY (Self-employed) | Saudi Arabia (Remote) | Sep 2023 - Present

- Set product architecture and platform strategy for AI-first products, building autonomous agents, GenAI-powered workflows and cloud-native platforms that scale with customers.
- Build and coach engineering teams, with a culture of ownership, fast feedback and experimentation.

Senior Software Engineering Manager

Remotebase | United States (Remote) | Aug 2021 - May 2025

- Promoted twice in under two years, from Senior Software Engineer (Aug 2021) to Software Engineering Manager (Aug 2022) to Senior Software Engineering Manager (Jul 2023), while working full-time with the US clients listed below.

Software Engineering Manager

Gridware (via Remotebase) | United States (Remote) | Jan 2024 - Apr 2025

- Led a team of 12 and cut production incidents by about 50% by introducing observability across core platforms, moving the team from reactive firefighting to prevention.

- Designed serverless solutions on AWS using microservices and SOA (NestJS), and streamlined delivery with GraphQL, AWS Amplify and CI/CD pipelines.
- Managed cloud-native and mobile-first platforms, owning incident management and production stability.
- Aligned the roadmap directly with C-level stakeholders and external customers.

Technical Team Lead

Northwestern Mutual (via Remotebase) | United States | Aug 2022 - Dec 2023

- Increased delivery throughput by up to 50% by implementing Agile and Scrum practices that improved sprint execution and predictability.
- Delivered scalable applications with React Native and FastAPI, and designed and managed AWS-based CI/CD pipelines.
- Led cross-functional teams across frontend, backend and DevOps workstreams, reporting status, risks and milestones to senior leadership.

Senior Software Engineer

Capbase (via Remotebase) | United States | Aug 2021 - Aug 2022

- Architected serverless systems on AWS Lambda with a microservices-based design.
- Built and maintained backend services with GraphQL and AWS Amplify.
- Enforced code quality through unit testing and code reviews, and mentored team members.

Senior Software Engineer

TLX Mobility, a Techlogix Company | Karachi, Pakistan | Apr 2020 - Aug 2021

- Delivered cloud-based backend systems for Nokia Pakistan and Middle East.
- Built serverless applications on Azure Functions and microservices-based APIs.
- Resolved security findings from penetration tests and audits, and fixed performance issues and memory leaks.

Software Engineer

TLX Mobility, a Techlogix Company | Karachi, Pakistan | Oct 2017 - Apr 2020

- Built Angular and AngularJS frontends for FMCG and Payments products for clients including Nestle and Unilever.
- Developed serverless applications and microservices-based APIs.

Junior Software Developer

KNYSYS | Karachi, Pakistan | Aug 2016 - Oct 2017

- Dual Android and backend role, delivering end-to-end features across the full SDLC in fast-paced client projects.
- Built RESTful APIs with Django and web2py, integrated YouTube and Google Maps APIs, and developed browser extensions for real-time user monitoring.

GULF-MARKET PROJECTS

- WheeKeep, Storage and Logistics platform (Saudi Arabia): architected the full solution, including iOS and Android apps, web portal, real-time delivery tracking and a cloud-native backend, supporting 10,000+ deliveries across 5 cities.
- Lugmety, Food-Recommendation AI (Gulf food delivery): personalization engine for larger baskets and repeat orders.
- Salasa, Delivery-ETA AI (Gulf e-commerce fulfillment and logistics): delivery-time estimation model.

CERTIFICATIONS

- PMI: Project Management Professional (PMP), PMI Agile Certified Practitioner (PMI-ACP), Value Stream Management
- PMI: Generative AI Overview for Project Managers, Data Landscape of GenAI for Project Managers, PMI Citizen Developer Practitioner, PMI Citizen Developer Business Architect
- IBM: IBM Blockchain Essentials. All badges are verifiable on Credly, linked from anasabdani.dev

EDUCATION

B.E. Software Engineering | NED University of Engineering and Technology, Karachi | 2013 - 2017

RECOMMENDATIONS

"The definition of going above and beyond as a software leader... the perfect engineering partner to build a complicated and reliable product."
A Bin Omar, Co-founder and CPO, Gridware

"Anas combines technical excellence with leadership, ownership, and integrity... Any organization would be lucky to have him."
Qasim Salam, CEO, Remotebase (managed Anas directly). More: linkedin.com/in/anas-abdani/details/recommendations
